script.js Content

```javascript
// Nova Sound Studio - Basic Controls

// Simulate audio with a dummy function (real audio needs server or file)
const playBtn = document.getElementById('play');
const pauseBtn = document.getElementById('pause');
const volumeControl = document.getElementById('volume');

// Play button
playBtn.addEventListener('click', () => {
  alert('Sound playing — your beat is live!');
});

// Pause button
pauseBtn.addEventListener('click', () => {
  alert('Sound paused — ready when you are.');
});

// Volume control
volumeControl.addEventListener('input', () => {
  const vol = volumeControl.value;
  console.log(`Volume set to ${vol}%`);
});
```
